‘It worries me to death, Albert, it really does,’ Mrs. Taylor said.
She kept her eyes fixed on the baby who was now lying absolutely motionless in the crook of her left arm.
‘I just know there’s something wrong.’

The skin on the baby’s face had a pearly translucent quality, and was stretched very tightly over the bones.
‘Try again,’ Albert Taylor said.
‘It won’t do any good.’
‘You have to keep trying, Mabel,’ he said.

She lifted the bottle out of the saucepan of hot water and shook a few drops of milk on to the inside of her wrist, testing for temperature.
‘Come on,’ she whispered, ‘Come on, my baby. Wake up and take a bit more of this.’
There was a small lamp on the table close by that made a soft yellow glow all around her.
‘Please,’ she said. ‘Take just a weeny bit more.’

The husband watched her over the top of his magazine. She was half dead with exhaustion, he could see that, and the pale oval face, usually so grave and serene, had taken on a kind of pinched and desperate look. But even so, the drop of her head as she gazed down at the child was curiously beautiful.

‘You see,’ she murmured. ‘It’s o good. She won’t have it.’

‘She held the bottle up to the light, squinting at the calibrations.
‘One ounce (29 g) again. That’s all she takes. No – it isn’t even that. It’s only three quarters. It’s not enough to keep body and soul together. Albert, it really isn’t. It worries me to death.’
‘I know,’ he said.
‘If only they could find out what was wrong.’

‘There’s nothing wrong, Mabel. It’s just a matter of time.’
‘Of course there’s something wrong.’
‘Doctor Robinson says no.’
‘Look,’ she said, standing up. ‘You can’t tell me it’s natural for a six-week-old child to weigh less, less by more than two whole pounds (900 g) than she did when she was born! Just look at those legs!

They’re nothing but skin and bone!’
The tinnv baby lay limply on her arm, not moving.
‘Doctor Robinson said you was to stop worrying, Mabel. So did that other one.’
‘Ha!’ she said. ‘Isn’t that wonderful! I’m to stop worrying!’
‘Now, Mabel!’

‘What does he want me to do? Treat it as some sort of a joke?’
‘He didn’t say that.’
‘I hate doctors! I hate them all!’ she cried, and she swung away from him and walked quickly out of the room towards the stairs, carrying the baby with her.

Albert Taylor stayed where he was and let her go.

In a little while he heard her moving about in the bedroom directly over his head, quick nervous footsteps going tap tap tap on the linoleum above. Soon the footsteps would stop, and then he would have to get up and follow her, and when he went into the bedroom he would find her sitting beside the cot as usual, staring at the child and crying softly to herself and refusing to move.

‘She’s starving, Albert,’ she would say.

‘Of course she’s not starving.’
‘She is starving. I know she is. And Albert?’
'Yes?'
'I believe you know it too, but you won’t admit it. Isn’t that right?’
Every night now it was like this.

50 Last week they had taken the child back to the hospital, and the doctor had examined it carefully
and told them that there was nothing to matter.
‘It took us nine years to get this baby,’ Mabel had said. ‘I think it would kill me if anything should
happen to her.’
That was six days ago and since then it had lost another five ounces. (140g)

55 But worrying about it wasn’t going to help anybody, Albert Taylor told himself. One simply had to
trust the doctor on a thing like this. He picked up the magazine that was still lying on his lap and
 glanced idly down the list of contents to see what it had to offer this week:
- Among the Bees in May
- Honey Cookery
- The Bee Farmer and the B. Pharm.
- Experiences in the Control of Nosema
- The Latest on Royal Jelly
- This Week in the Apiary
- The Healing Power of Propolis
- Regurgitations
- British Beekeepers Annual Dinner
- Association News

70 Part II
All his life Albert Taylor had been fascinated by anything that had to do with bees. As a small boy he
often used to catch them in his bare hands and go running with them into the house to show to his
mother, and sometimes he would put them on his face and let them crawl about over his cheeks and
neck, and the astonishing thing about it all was that he never got stung. On the contrary, the bees
seemed to enjoy being with him. They never tried to fly away, and to get rid of them he would have
to brush them off gently with his fingers. Even then they would frequently return and settle again on
his arm or hand or knee, any place where the skin was bare.

As he grew older, Albert Taylor’s fascination with bees developed into an obsession, and by the time
he was 12 he has built his first hive. The following summer he had captured his first swarm. Two
years later, at the age of 14, he had no less than 5 hives standing neatly in a row against the fence in
his father’s small backyard.
He never had to use smoke when there was work to do inside the hive and he never wore gloves on
his hands or a net over his head. Clearly there was some strange sympathy between this boy and the
bees, and down in the village, in the shops and pubs, they began to speak about him with a certain
kind of respect, and people started coming up to the house to buy honey.

When he was 18, he had rented one acre of rough pasture and there he had set out to establish his
own business. Now, eleven years later, he was still in the same spot, but he had six acres (2.4
hectares) of ground instead of one, two hundred and forty well-stocked hives, and a small house
he’d built mainly with his own hands. He had married at the age of 20 and that, apart from the fact
that it had taken them over nine years to get a child, had also been a success. In fact, everything had
gone pretty well for Albert until this strange little baby girl came along and started frightening them
out of their wits by refusing to eat properly and losing weight every day.
He looked up from the magazine and began thinking about his daughter.

95 This evening, for instance, when she had opened her eyes at the beginning of the feed, he had gazed
into them and seen something that frightened him to death – a kind of misty vacant stare, as though
the eyes themselves were not connected to the brain at all but were just lying loose in their sockets
like a couple of small grey marbles.
Did those doctors really know what they were talking about?
One could always take her along to another hospital, somewhere in Oxford perhaps. He might suggest that to Mabel when he went upstairs.

He could still hear her moving around in the bedroom, but she must have taken off her shoes now and put on slippers because the noise was very faint. He switched his attention back to the magazine and went on with his reading. He finished the article called ‘Experiences in the Control of Nosema’, then turned over the page and began reading the next one. ‘The Latest on Royal Jelly’. He doubted very much whether there would be anything in this that he didn’t know already:

‘What is this wonderful substance called royal jelly?’

Royal jelly is a glandular secretion produced by the nurse bees to feed the larvae immediately after they have hatched from the egg. The pharyngeal glands of bees produce this substance in much the same way as the mammary glands of vertebrates produce milk. The fact is of great biological interest because no other insects in the world are known to have evolved such a process.

All old stuff, he told himself, but for want of anything better to do, he continued to read.

Royal jelly is fed in concentrated form to all bee larvae for the first three days after hatching from the egg; but beyond that point, for all those who are destined to become drones or workers, this precious food is greatly diluted with honey and pollen. On the other hand, the larvae which are destined to become queens are fed throughout the whole of their larval period on a concentrated diet of pure royal jelly. Hence the name.

Above him, up in the bedroom, the noise of footsteps had stopped altogether. The house was quiet.

Royal jelly must be a substance of tremendous nourishing power, for on this diet alone, the honey-bee larva increases in weight 1500 times in five days.

This is as if a seven-and-a-half pound baby (3.5 kg) should increase in that time to five tons.

Albert Taylor stopped and read that sequence again. He read it a third time. ‘This is as if a seven-and-a-half pound baby (3.5 kg)...

‘Mabel!’ he cried, jumping up from his chair. ‘Mabel! Come here!’

He went out into the hall and stood at the foot of the stairs calling for her to come down. There was no answer.

He ran up the stairs and switched on the light on the landing. The bedroom door was closed. He crossed the landing and opened it and stood in the doorway looking into the dark room. ‘Mabel,’ he said. ‘Come downstairs a moment, will you please? I’ve just had a bit of an idea. It’s about the baby.’

The light from the landing behind him cast a faint glow over the bed and he could see her dimly now, lying on her stomach with her face buried in the pillow and her arms up over her head. She was crying again.

‘Mabel,’ he said, going over to her, touching her shoulder. ‘Please come down a moment. This may be important.’

‘Go away,’ she said. ‘Leave me alone.’

‘Don’t you want to hear about my idea?’

‘Oh, Albert, I’m tired,’ she sobbed. ‘I’m so tired I don’t know what I’m doing any more. I don’t think I can go on. I don’t think I can stand it.’

There was a pause, Albert Taylor turned away from her and walked slowly over to the cradle where the baby was lying, and peered in. (...)

‘What time is the next feed?’ he asked.

‘Two o’clock, I suppose.’

‘And the one after that?’

‘Six in the morning.’

‘I’ll do them both,’ he said. ‘You go to sleep.’

She didn’t answer.

‘You get properly into bed, Mabel, and go straight to sleep, you understand? And stop worrying. I’m taking over completely for the next 12 hours. You’ll give yourself a nervous breakdown going on like
Yes,' she said. 'I know.' I'm taking the nipper and myself and the alarm clock into the spare room this very moment, so you just lie down and relax and forget all about us. Right? Already he was pushing the cradle out through the door. 'Oh, Albert,' she sobbed. 'Don't worry about a thing. Leave it to me.'

Albert...

'Yes?'

'I love you Albert.'

'I love you too, Mabel. Now go to sleep.'

Albert Taylor didn't see his wife again until nearly 11 o'clock the next morning. 'Good gracious me!' she cried, rushing down the stairs in dressing-gown and slippers. 'Albert! Just look at the time! I must have slept twelve hours at least! Is everything all right? What happened?'

He was sitting quietly in his armchair, smoking a pipe and reading the morning paper. The baby was in a sort of carry-cot on the floor at his feet, sleeping-

'Hullo, dear,' he said smiling. She ran over to the cot and looked in. 'Did she take anything, Albert? How many times have you fed her? She was due for another one at 10 o'clock, did you know that?'

Albert Taylor folded the newspaper neatly into a square and put it away on the side table. 'I fed her at two in the morning,' he said, 'and she took about half an ounce, no more. I fed her again at six and she did a bit better that time, two ounces....''Two ounces! Oh, Albert, that's marvellous!'

And we just finished the last feed ten minutes ago. There's the bottle on the mantelpiece. Only one ounce left. She drank three. How's that? He was grinning proudly, delighted with his achievement. The woman quickly got down on her knees and peered at the baby. 'Doesn't she look better?' he asked eagerly. 'Doesn't she look fatter in the face?'

'It may sound silly,' the wife said, 'but actually I think she does. Oh, Albert, you're a marvel! How did you do it?'

'She's turning the corner,' he said. 'That's all it is. Just like the doctor prophesied, she's turning the corner.'

'I pray to God you're right, Albert.'

'Of course I'm right. From now on, you watch her go.'

The woman was gazing lovingly at the baby. 'You look a lot better yourself too, Mabel.'

'I feel wonderful. I'm sorry about last night.'

'Let's keep it this way,' he said. 'I'll do all the night feeds in future. You do the day ones.'

She looked up at him across the cot, frowning. 'No,' she said. 'Oh no, I wouldn't allow you to do that.'

'I don't want you to have a breakdown, Mabel.'

'I won't, not now, I've had some sleep.'

'Much better we share it.'

'No, Albert. This is my job and I intend to do it. Last night won't happen again.'

'All right,' he said. 'In that case I'll just relieve you of the donkey work; I'll do all the sterilizing and mixing of the food and getting everything ready. That'll help you a bit, anyway. I've been thinking that up until last night I've never even raised a finger to help you with this baby.'

'That isn't true.'

'Oh yes it is. So I've decided that from now on I'm going to do my share of the work. I'm going to be the feed-mixer and the bottle-steriliser. Right?'

'It's very sweet of you, dear, but I really don't think it's necessary....' 'Come on!' he cried. 'Don't change the luck! I've done it the last three times and just look what happened! When's the next one? Two o'clock, isn't it?'

'Yes.'
‘It’s all mixed,’ he said. ‘Everything’s all mixed and ready and all you’ve got to do when the time comes is to go out three to the larder and take it off the shelf and warm it up. That’s some help, isn’t it?’

The woman got up off her knees and went over to him and kissed him on the cheek. ‘You’re such a nice man,’ she said. ‘I love you more and more every day I know you.’

Later, in the middle of the afternoon, when Albert was outside in the sunshine working among the hives, he heard her calling to him from the house.

‘Albert!’ she shouted. ‘Albert, come here!’

He started forward to meet her, wondering what was wrong.

‘Oh, Albert! Guess what!’

‘What?’

‘I’ve just finished giving her the two-o’clock feed and she’s taken the whole lot!’

‘No!’

‘Every drop of it! Oh, Albert, I’m so happy! She’s going to be all right! She’s turned the corner just like you said!’ She came up to him and threw her arms round his neck and hugged him, and he clapped her on the back and laughed and said what a marvellous little mother she was.

Naturally, there was a certain amount of suspense in the air as the time approached for the 6 o’clock feed. By five thirty both parents were already seated in the living-room waiting for the moment to arrive. The bottle with the milk formula in it was standing in a saucepan of warm water on the mantelpiece. The baby was asleep in its carry-cot on the sofa.

At twenty minutes to six it woke up and started screaming its head off.

‘There you are!’ Mrs. Taylor cried. ‘She’s asking for the bottle. Pick her up quick, Albert, and hand her to me here. Give me the bottle first.’

He gave her the bottle, then placed the baby on the woman’s lap. Cautiously, she touched the baby’s lips with the end of the nipple. The baby seized the nipple between its gums and began to suck ravenously with a rapid powerful action.

‘Oh, Albert, isn’t it wonderful?’

‘It’s terrific, Mabel.’

In seven or eight minutes, the entire contents of the bottle had disappeared down the baby’s throat.

‘You clever girl,’ Mrs. Taylor said- ‘Four ounces again.’

Albert Taylor was leaning forward in his chair, peering intently into the baby’s face. ‘You know what?’ he said. ‘She even seems as though she’s put on a touch of weight already. What do you think?’

The mother looked down at the child.

‘Doesn’t she seem bigger and fatter to you, Mabel, than she was yesterday?’

‘Maybe she does, Albert. I’m not sure. Although actually there couldn’t be any real gain in such a short time as this. The important thing is that she’s eating normally.’

‘She’s turned the corner,’ Albert said. ‘I don’t think you need to worry about her anymore.’

‘I certainly won’t.’

‘You want me to go up and fetch the cradle back into our bedroom. Mabel?’

‘Yes, please,’ she said.

Albert went upstairs and moved the cradle. The woman followed with the baby, and after changing its nappy, she laid it gently down on its bed. Then she covered it with sheet and blanket.

‘Doesn’t she look lovely, Albert?’ she whispered. ‘Isn’t that the most beautiful baby you’ve ever seen in your entire life?’

After they had finished eating, the parents settled themselves in armchairs in the living-room, Albert with his magazine and his pipe, Mrs. Taylor with her knitting.

‘Albert,’ she said after a while.

‘Yes, dear?’

‘What was it you were going to tell me last night when you came rushing up to the bedroom? You said you had an idea for the baby.’

Albert Taylor lowered the magazine on to his lap and gave her a long sly look.

‘Did I?’ he said.
‘Yes.’ She waited for him to go on, but he didn’t. ‘What’s the big joke?’ she asked. ‘Why are you grinning like that?’
‘It’s a joke all right,’ he said.
‘Tell it to me, dear.’

I’m not sure I ought to,’ he said. ‘You might call me a liar.’
She had seldom seen him looking so pleased with himself as he was now, and she smiled back at him, egging him on.
‘I’d just like to see your face when you hear it, Mabel, that’s all.’

‘Albert, what is all this?’

He paused, refusing to be hurried.
‘You do think the baby is better, don’t you?’ he asked.
‘Of course I do.’
‘You agree with me that all of a sudden she’s feeding marvellously and looking one hundred percent different?’

‘I do, Albert, yes.’
‘That’s good,’ he said, the grin widening. ‘You see, it’s me that did it.’
‘Did what?’
‘I cured the baby.’
‘Yes, dear, I’m sure you did.’ Mrs. Taylor went right on with her knitting.

‘You don’t believe me, do you?’
‘Of course I believe you, Albert. I give you all the credit, every bit of it.’
‘Then how did I do it?’
‘Well, she said, pausing a moment to think. ‘I suppose it’s simply that you’re a brilliant feed-mixer. Ever since you started mixing the feeds she’s got better and better.’

‘You mean there’s some sort of an art in mixing the feeds?’
‘Apparently there is.’
‘I’ll tell you a secret,’ he said. ‘You’re absolutely right. Although, mind you, it isn’t so much how you mix it that counts. It’s what you put in. You realize that, don’t you, Mabel?’
Mrs. Taylor stopped knitting and looked up sharply at her husband.

‘Albert,’ she said, ‘don’t tell me you’ve been putting things into that child’s milk?’
He sat there grinning.
‘Well, have you or haven’t you?’
‘It’s possible,’ he said.
‘I don’t believe you.’

He had a strange fierce way of grinning that showed his teeth.

‘Albert,’ she said. ‘Stop playing with me like this.’
‘Yes, dear, all right.’
‘You haven’t really put anything into her milk, have you? Answer me properly, Albert. This could be serious with such a tiny baby.’

The answer is yes, Mabel.’

‘Albert Taylor! How could you?’
‘Now don’t get excited,’ he said. ‘I’ll tell you all about it if you really want me to, but for heaven’s sake keep your hair on.’
‘It was beer!’ she cried. ‘I just know it was beer!’

‘Don’t be so daft, Mabel, please.’
‘Then what was it?’

Part IV

Albert laid his pipe down carefully on the table beside him and leaned back in his chair. ‘Tell me,’ he said, ‘did you ever by any chance happen to hear me mentioning something called royal jelly?’
‘I did not.’
‘It’s magic,’ he said. ‘Pure magic. And last night I suddenly got the idea that if I was to put some of this into the baby’s milk...’

‘How dare you!’

‘Now Mabel, you don’t even know what it is yet.’

‘I don’t care what it is,’ she said. ‘You can’t go putting foreign bodies like that into a tiny baby’s milk. You must be mad.’

‘It’s perfectly harmless, Mabel, otherwise I wouldn’t have done it. It comes from bees.’

‘I might have guessed that.’

‘And it’s so precious that practically no one can afford to take it. When they do, it’s only one little drop at a time.’

‘And how much did you give to our baby, might I ask?’

‘Ah,’ he said. ‘That’s the whole point. That’s where the difference lies. I reckon that our baby, just in the last four feeds, has already swallowed about 50 times as much royal jelly as anyone else in the world has ever swallowed before. How about that?’

‘Albert, stop pulling my leg.’

‘I swear it,’ he said proudly.

She sat there staring at him, her brow wrinkled, her mouth slightly open.

‘You know what this stuff actually costs, Mabel, if you want to buy it? There’s a place in America advertising it for sale this very moment for something like five hundred dollars a pound jar! Five hundred dollars! That’s more than gold, you know!’

She hadn’t the faintest idea what he was talking about.

‘I’ll prove it,’ he said, and jumped up and went across to the large bookcase where he kept all his literature about bees. He took down the last issue of the American Bee Journal and turned to a page of small classified advertisements at the back.

‘Here you are,’ he said. ‘Exactly as I told you, “We sell royal jelly - $480 per lb jar wholesale.”’

He handed her the magazine so she could read it herself.

‘Now do you believe me? This is an actual shop in New York, Mabel. It says so.’

‘It doesn’t say you can go stirring it into the milk of a practically newborn baby,’ she said. ‘I don’t know what’s come over you, Albert, I really don’t.’

‘It’s curing her, isn’t it?’

‘I’m not sure about that, now.’

‘Don’t be damn silly, Mabel. You know it is.’

‘Then why haven’t other people done it with their babies?’

‘I keep telling you,’ he said. ‘It’s too expensive. Practically nobody in the world can afford to buy royal jelly just for eating except maybe one or two multimillionaires. The people who buy it are the big companies that make women’s face creams and things like that. They’re using it as a stunt. They mix a tiny pinch of it into a big jar of face cream and it’s selling like hot cakes for absolutely enormous prices. They claim it takes out the wrinkles.’

‘And does it?’

‘Now how on earth would I know that, Mabel? Anyway,’ he said, returning to his chair, ‘that’s not the point. The point is this. It’s done so much good to our little baby just in the last few hours that I think we ought to go right on giving it to her. Now don’t interrupt, Mabel. Let me finish. I’ve got 240 hives out there and if I turn over maybe a hundred of them to making royal jelly, we ought to be able to supply her with all she wants.’

‘Albert Taylor,’ the woman said, stretching her eyes wide and staring at him. Have you gone out of your mind?’

‘Just hear me through, will you please?’

‘I forbid it,’ she said, ‘absolutely. You’re not to give my baby another drop of that horrid jelly, you understand?’

‘Now, Mabel... Do me a favour, will you?’ he said. ‘Let me explain some of the marvellous things this stuff does.’

‘You haven’t even told me what it is yet.’

‘All right, Mabel. I’ll do that too. Will you listen? Will you give me a chance to explain it?’
She sighed and picked up her knitting once more. ‘I suppose you might as well get it off your chest, Albert. Go on and tell me.’

He paused, a bit uncertain now how to begin. It wasn’t going to be easy to explain something like this to a person with no detailed knowledge of apiculture at all.

‘You know, don’t you,’ he said, ‘that each colony has only one queen?’

‘Yes.’

‘And that this queen lays all the eggs?’

‘Yes, dear. That much I know.’

‘All right. Now the queen can actually lay two different kinds of eggs. She can lay eggs that produce drones, and she can lay eggs that produce workers. Now if that isn’t a miracle, Mabel, I don’t know what is.’

‘Yes, Albert, all right.’

‘The drones are the males. We don’t have to worry about them. The workers are the females. So is the queen, of course.’

‘Now what happens is this. The queen crawls around on the comb and lays her eggs in what we call cells. She lays one egg to each cell, and in three days each of these eggs hatches out into a tiny grub. We call it larva. Now, as soon as this larva appears, the nurse bees – they’re young workers – all crowd round and start feeding it like mad. And you know what they feed it on?’

‘Royal jelly,’ Mabel answered patiently.

‘Right!’ he cried. ‘That’s exactly what they do feed it on. They get this stuff out of a gland in their heads and they start pumping it into the cell to feed the larva. And what happens then? You want to know what happens then?’ he asked, wetting his lips.

‘I can hardly wait.’

‘“Royal jelly,”’ he read aloud, ‘“must be a substance of tremendous nourishing power, for on this diet alone, the honey-bee larva increases in weight 1500 times in five days!”’

‘How much?’

‘Fifteen hundred times, Mabel. And you know what that means if you put it in terms of a human being? It means, ‘ he said, lowering his voice, leaning forward, fixing her with those small pale eyes, ‘it means that in five days a baby weighing seven and a half pounds to start off with would increase in weight to five tons!’

For the second time, Mrs. Taylor stopped knitting.

‘Now you mustn’t take that too literally, Mabel.’

‘Who says I mustn’t?’

‘Very well, Albert. Go on.’

‘But that’s only half the story,’ he said. ‘There’s more to come. The really amazing thing about royal jelly, I haven’t told you yet. I’m going to show you now how it can transform a plain dull looking little worker bee with practically no sex organs at all into a great big beautiful fertile queen.’

‘Are you saying our baby is dull-looking and plain?’ she asked sharply.

‘It means that in five days a baby weighing seven and a half pounds to start off with would increase in weight to five tons!’

For the second time, Mrs. Taylor stopped knitting.

‘Now you mustn’t take that too literally, Mabel.’

‘Who says I mustn’t?’

‘Very well, Albert. Go on.’

‘But that’s only half the story,’ he said. ‘There’s more to come. The really amazing thing about royal jelly, I haven’t told you yet. I’m going to show you now how it can transform a plain dull looking little worker bee with practically no sex organs at all into a great big beautiful fertile queen.’

‘Are you saying our baby is dull-looking and plain?’ she asked sharply.

‘It’s as true as I’m sitting here, Mabel, honest it is. Any time the bees want a queen to hatch out of the egg instead of a worker, they can do it.’

‘How?’

‘Ah,’ he said, shaking a thick forefinger in her direction. ‘That’s just what I’m coming to. That’s the secret of the whole thing. Now – what do you think it is, Mabel that makes this miracle happen?’

‘Royal jelly,’ she answered. ‘You already told me.’

‘Royal jelly it is!’ he cried, clapping his hands and bouncing up on his seat. His big round face was glowing with excitement now, and two vivid patches of scarlet had appeared high up on each cheek. ‘Here’s how it works. I’ll put it very simple for you. The bees want a new queen. So they build an extra-large cell, a queen cell we call it, and they get the old queen to lay one of her eggs in there. The other one thousand nine hundred and ninety-nine eggs she lays in ordinary worker cells. Now. As
soon as these eggs hatch into larvae, the nurse bees rally round and start pumping in the royal jelly. All of them get it, workers as well as queen. But here is the vital thing, Mabel, so listen carefully. Here’s where the difference comes. The worker larvae only receive this special marvellous food for the first three days of their larval life. After the third day they’re put straight away on to more or less routine bees’ food – a mixture of honey and pollen – and then about two weeks later they emerge from the cells as workers.

‘But not so the larva in the queen cell! This one gets royal jelly all the way through its larval life. The nurse bees simply pour it into the cell, so much so in fact that the little larva is literally floating in it. And that’s what makes it into a queen!’

‘You can’t prove it,’ she said.

‘Don’t talk so damn silly, Mabel, please. Thousands of people have proved it time and time again, famous scientists in every country in the world. All you have to do is take a larva out of a worker cell and put it in a queen cell (...) and just so long as the nurse bees keep it well supplied with royal jelly, then presto! – it’ll grow up into a queen! And what makes it more marvellous still is the absolutely enormous difference between a queen and a worker when they grow up. The abdomen is a different shape. The sting is different. The legs are different. The.... (...)

‘It’s pretty hard to believe,’ she said, ‘that a food can do all that.’

‘Of course it’s hard to believe. It’s another of the miracles of the hive.’

He stood beside the bookcase with the magazine in his hand, smiling a funny little furtive smile of triumph, and his wife watched him, bewildered.

He was not a tall man; he had a thick plump pulpy-looking body that was built close to the ground on abbreviated legs. The legs were slightly bowed. The head was huge and round, covered with bristly short-cut hair, and the greater part of the face – now that he had given up shaving altogether – was hidden by a brownish yellow fuzz about an inch (2,5 cm) long. In one way and another, he was rather grotesque to look at; there was no denying in that.

Looking at him now as he buzzed around in front of the bookcase with his bristly head and his hairy face and his plump pulpy body, she couldn’t help thinking that somehow, in some curious way, there was a touch of the bee about this man. Up until now it had never occurred to her that her husband might look like a bee. It shocked her a bit.

‘You know something? She said, staring at him but smiling a little all the same: ‘You’re getting to look just a teeny bit like a bee yourself, did you know that?’

He turned and looked at her.

‘I suppose it’s the beard mostly,’ she said. ‘I do wish you’d stop wearing it. Even the colour is sort of bee-ish, don’t you think?’

‘What the hell are you talking about, Mabel?’

‘Albert,’ she said. ‘Your language.’

‘Do you want to hear any more of this or don’t you?’

‘Yes, dear, I’m sorry. I was only joking. Do go on.’

He turned away again and pulled another magazine out of the bookcase and began leafing through the pages. ‘Now just listen of this, Mabel.’

‘Still and Burdett found that a male rat which hitherto had been unable to breed, upon receiving a minute daily dose of royal jelly, became a father many times over’”.

‘Albert,’ she cried, ‘this stuff is much too strong to give to a baby! I don’t like it at all.’

‘Nonsense, Mabel.’

‘Listen!’ Mrs. Taylor said, interrupting him. ‘I think the baby’s crying.’

Albert glanced up from his reading. Sure enough, a lusty yelling noise was coming from the bedroom above.

‘She must be hungry,’ he said.

His wife looked at the clock. ‘Good gracious me!’ she cried, jumping up. ‘It’s past her time again already! You mix the feed, Albert, quickly, while I bring her down! I don’t want to keep her waiting.’
In half a minute, Mrs. Taylor was back, carrying the screaming infant in her arms. ‘Do be quick, Albert!’ she called, settling herself in the armchair and arranging the child on her lap. ‘Please hurry!’

Albert entered from the kitchen and handed her the bottle of warm milk. ‘It’s just right,’ he said. ‘You don’t have to test it.’

She hitched the baby’s head a little higher in the crook of her arm, then pushed the rubber teat straight into the wide-open yelling mouth. The baby grabbed the teat and began to suck. The yelling stopped. Mrs. Taylor relaxed. ‘Oh, Albert, isn’t she lovely?’

‘She’s terrific, Mabel – thanks to royal jelly.’

‘Now, dear, I don’t want to hear another word about that nasty stuff. It frightens me to death.’

‘You’re making a big mistake,’ he said.

‘We’ll see about that.’

The baby went on sucking the bottle.

‘I do believe she’s going to finish the whole lot again, Albert.’

‘I’m sure she is,’ he said.

And a few minutes later, the milk was all gone.

‘Oh, what a good girl you are!’ Mrs. Taylor cried, as very gently she started to withdraw the nipple.

The baby sensed what she was doing and sucked harder, trying to hold on. The woman gave a quick little tug and plop, out it came.

‘Waa! Waa! Waa! Waa! Waa! Waa!’ the baby yelled.

‘Nasty old wind,’ Mrs. Taylor said, hoisting the child on to her shoulder and patting its back.

‘Now, dear, I don’t want to hear another word about that nasty stuff. It frightens me to death.’

‘You’re making a big mistake,’ he said.

‘We’ll see about that.’

The baby went on sucking the bottle.

‘I do believe she’s going to finish the whole lot again, Albert.’

‘I’m sure she is,’ he said.

And a few minutes later, the milk was all gone.

‘Oh, what a good girl you are!’ Mrs. Taylor cried, as very gently she started to withdraw the nipple.

The baby sensed what she was doing and sucked harder, trying to hold on. The woman gave a quick little tug and plop, out it came.

‘Waa! Waa! Waa! Waa! Waa! Waa!’ the baby yelled.

‘Nasty old wind,’ Mrs. Taylor said, hoisting the child on to her shoulder and patting its back.

‘Good for the lungs,’ Albert Taylor said, grinning. ‘That’s the way they exercise their lungs, Mabel, did you know that?’

‘There, there, there,’ the wife said, kissing it all over the face. ‘There, there, there.’

They waited another five minutes, but not for one moment did the screaming stop.

‘Change the nappy,’ Albert said. ‘It’s got a wet nappy, that’s all it is.’ He fetched a clean one from the kitchen, and Mrs. Taylor took the old one off and put the new one Mrs. Taylor on.

This made no difference at all.

‘Waa! Waa! Waa! Waa! Waa! Waa!’ the baby yelled.

‘You didn’t stick the safety pin through the skin, did you, Mabel?’

‘Of course I didn’t,’ she said, feeling under the nappy with her fingers to make sure.

The parents sat opposite one another in their armchairs, smiling nervously, watching the baby on the mother’s lap, waiting for it to tire and stop screaming.

‘You know what?’ Albert said at last.

‘What?’

‘I’ll bet she’s still hungry. I’ll bet all she wants is another swig at that bottle. How about me fetching her an extra lot?’

‘I don’t think we ought to do that, Albert.’

‘It’ll do her good,’ he said, getting up from his chair. ‘I’m going to warm her up a second helping.’

He went into the kitchen, and was away for several minutes. When he returned he was holding a bottle brimful of milk.

‘I made her a double,’ he announced. ‘Eight ounces. Just in case.’

‘Albert! Are you mad! Don’t you know it’s just as bad to overfeed as it is to underfeed?’

‘You don’t have to give her the lot, Mabel. You can stop any time you like. Go on,’ he said, standing over her. ‘Give her a drink.’
Mrs. Taylor began to tease the baby's lip with the end of the nipple. The tiny mouth closed like a trap over the rubber teat and suddenly there was silence in the room. The baby's whole body relaxed and a look of absolute bliss came over its face as she started to drink.
'There you are, Mabel! What did I tell you?'

The woman didn’t answer.
'She's ravenous, that's what she is. Just look at her suck.'
Mrs. Taylor was watching the level of milk in the bottle. It was dropping fast, and before long three or four ounces out of the eight had disappeared.
'There,' she said. 'That'll do.'

'You can't pull it away now, Mabel.'
'Yes, dear. I must.'
'Go on, woman. Give her the rest and stop fussing.'
'But, Albert...'
'She's finished, can't you see that? Go on, my beauty,' he said. 'You finish that bottle.'

'I don't like it, Albert,' the wife said, but she didn't pull the bottle away.
'She's making up for lost time, Mabel, that's all she's doing.'
Five minutes later the bottle was empty. Slowly, Mrs. Taylor withdrew the nipple, and this time there was no protest from the baby, no sound at all. It lay peacefully on the mother's lap, the eyes glazed with contentment, the mouth half open, the lips smeared with milk.

'Twelve whole ounces (340g), Mabel!' Albert Taylor said. 'Three times the normal amount! Isn't that amazing?'
The woman was staring down at the baby. And now the old anxious tight-lipped look of the frightened mother was slowly returning to her face.
'Come here, Albert,' she said.

'What?'
'I said come here.'
He went over and stood beside her.
'Take a good look and tell me if you see anything different.'
He peered closely at the baby. 'She seems bigger, Mabel, if that's what you mean. Bigger and fatter.'

'Hold her,' she ordered. 'Go on, pick her up.'
He reached out and lifted the baby up off the mother's lap. 'Good God!' he cried. 'She weighs a ton!' 'Exactly.'
'Now isn't that marvellous!' he cried, beaming. 'I'll bet she must be back to normal already!' 'It frightens me, Albert. It's too quick.'

'Nonsense, woman.'
'It's that disgusting jelly that's done it,' she said. 'I hate the stuff.'
'There's nothing disgusting about royal jelly,' he answered, indignant. 'Don't be a fool. Albert! You think it's normal for a child to start putting on weight at this speed?'
'You're never satisfied!' he cried. 'You're scared stiff when she's losing and now you're absolutely terrified because she's gaining! What's the matter with you Mabel?'
The woman got up from her chair with the baby in her arms and started towards the door. 'All I can say is,' she said, 'it's lucky I'm here to see you don't give her any more of it, that's all I can say.' She went out, and Albert watched her through the open door as she crossed the hall to the foot of the stairs and started to ascend, and when she reached the third or fourth step she suddenly stopped and stood quite still for several seconds as though remembering something - then she turned and came down again rather quickly and re-entered the room.

'Albert,' she said.
'Yes.'
'I assume there wasn't any royal jelly in this last feed we've just given her?'

'I don't see why you should assume that, Mabel.'

'Albert!' 'What's wrong?' he asked, soft and innocent. 'How dare you!' she cried.
Albert Taylor’s great bearded face took on a painted and puzzled look. ‘I think you ought to be very glad she’s got another big dose of it inside her,’ he said (…)

The woman was standing just inside the doorway clasping the sleeping baby in her arms and staring at her husband with huge eyes. She stood very erect, her body absolutely stiff with fury, her face paler, more tight-lipped than ever.

‘You mark my words,’ Albert was saying, you’re going to have a nipper there soon that’ll win first prize in any baby show in the entire country. Hey, why don’t you weigh her now and see what she is? You want me to get the scales, Mabel, so you can weigh her?’

The woman walked straight over the large table in the centre of the room and laid the baby down and quickly started taking off its clothes.

‘Yes!’ she snapped. ‘Get the scales!’

Then she unpinned the nappy and she drew it away and the baby lay naked on the table.

‘But Mabel!’ Albert cried. ‘It’s a miracle! She’s fat as a puppy!’

Indeed, the amount of flesh the child had put on since the day before was astounding. The small sunken chest with the rib bones showing all over it was now plump and round as a barrel, and the belly was bulging high in the air. Curiously, though, the arms and legs did not seem to have grown in proportion. Still short and skinny, they looked like little sticks protruding from a ball of fat.

‘Look!’ Albert said. ‘She’s even beginning to get a bit of fuzz on the tummy to keep her war!’ He put out a hand and was about to run the tips of his fingers over the powdering of silky yellow-brown hairs that had suddenly appeared on the baby’s stomach.

‘Don’t you touch her!’ The woman cried. She turned and faced him, her eyes blazing, and she looked suddenly like some kind of little fighting bird with her neck arched over towards him as though she were about to fly at his face and peck his eyes out.

‘Now wait a minute,’ he said, retreating.

‘You must be mad!’ she cried.

‘Now wait just a minute, Mabel, will you please, because if you’re still thinking this stuff is dangerous…That is what you’re thinking, isn’t it? All right, then. Listen carefully, I shall now proceed to prove to you once and for all, Mabel, that royal jelly is absolutely harmless to human beings, even in enormous doses. For example – why do you think we had only half the usually honey crop last summer? Tell me that.’

His retreat, walking backwards, had taken him three or four yards away from her, where he seemed to be more comfortable.

‘The reason we had only half the usual crop last summer,’ he said slowly, lowering his voice, ‘was because I turned one hundred of my hives over to the production of royal jelly.’

‘You what?’

‘Ah,’ he whispered. ‘I thought that might surprise you a bit. And I’ve been making it ever since right under your very nose.’ His small eyes were glinting at her, and a slow sly smile was creeping around the corners of his mouth.

‘You’ll never guess the reason, either,’ he said. ‘I’ve been afraid to mention it up till now because I thought it might…well…sort of embarrass you.’

There was a slight pause. He had his hands clasped high in front of him, level with his chest, and he was rubbing one palm against the other, making a soft scraping noise.

‘You remember that bit I read you out of the magazine? That bit about the rat?’ He hesitated, the grin widening, showing his teeth.

‘You get the message, Mabel?’

She stood quite still, facing him.

‘The very first time I ever read that sentence, I just jumped straight out of my chair and I said to myself if it’ll work with a lousy rat, I said, then there’s no reason on earth why it shouldn’t work with Albert Taylor.’

He paused again, craning his head forward and turning one ear slightly in his wife’s direction, waiting for her to say something. But she didn’t.

‘And here’s another thing.’ He went on. It made me feel so absolutely marvellous, Mabel, and so sort
of completely different to what I was before that I went right on taking it even after you’d announced the joyful tidings. Buckets of it I must have swallowed during the last 12 months.’

The big heavy haunted-looking eyes of the woman were moving intently over the man’s face and neck. There was no skin showing at all on the neck, not even at the sides below the ears. The whole of it, to a point where it disappeared into the collar of the shirt, was covered all the way round with those shortish hairs, yellowy black.

‘Mind you,’ he said, turning away from her, gazing lovingly now at the baby, ‘it’s going to work far better on a tiny infant than on a fully developed man like me. You’ve only got to look at her to see that, don’t you agree?’

The woman’s eyes travelled slowly downward and settled on the baby. The baby was lying naked on the table, fat and white and comatose, like some gigantic grub that was approaching the end of its larval life and would soon emerge into the world complete with mandibles and wings.

‘Why don’t you cover it up, Mabel?’ he said. ‘We don’t want our little queen to catch a cold.’

The End
